

RUSKIN BRINGS RELIABLE SOLUTIONS TO DATA CENTERS

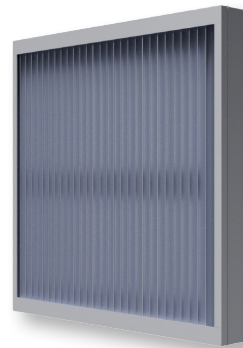

Data centers are among the most demanding applications for HVAC equipment. Ruskin has engineered high-performance, AMCA-certified products for data centers that meet rigorous standards for cooling and indoor air quality. These components are easy to install and are shipped fast from multiple factories in North America.

Dampers

DC model dampers are designed for optimal performance and reliability, featuring airfoil blades and Class 1A leakage performance with a low pressure drop.

Louvers

Give an added layer of protection to your information technology with Ruskin louvers. These are designed to withstand hurricane-force pressure and wind penetration.
