

E-SERIES DIRECT EVAPORATIVE COOLING TECHNOLOGY

The E-Series unit is for commercial and industrial applications, creating an effective and comfortable work environment for people occupying a space. The direct evaporative cooling unit uses 70% less energy than any other conventional mechanical cooling system. Airflow ranges from 10,000K to 80,000K of CFM. This outdoor unit has down blast, up blast and horizontal blast discharge with full galvanized steel on a single wall. A handful of available options and accessories including VFD controls are available.

ENGINEERS & CONTRACTORS

- 10 models ranging from 10,000 to 80,000 CFM
- Up to 2.5" Total Static Pressure
- Start-up Services

BUILDING OWNERS

- Provides superior IAQ and comfort for employees
- Energy Efficient VFD controls
- Reduces carbon footprint
